*LCR has gone down to 244% in Q2 from 312% in Q1 26. This drop was driven by both holistic reassessment of data extraction and mapping and time decay of liabilities run-off which increased wholesale deposits runoff (SAR 21.5 bn, including both reassessment impact and normal time decay of deposits runoff), increase in interbank borrowing runoff (SAR 2.2 bn) and got partially offset with the increase in unencumbered HQLAs and cash inflows.

*The NSFR remained robust and improved to 119% in Q2 (vs. 116% in Q1 26), primarily due to Customer Deposits (SAR 21 bn), Interbank Borrowing (SAR 7.3 bn), alongside modest asset growth.

The average LCR is calculated by taking a simple average of monthly figures based on daily average balances beginning from Apr 1st, 2026 to Jun 30th, 2026.

As at end-June 2026, the group reported an average liquidity coverage ratio (LCR) as 243.68%, significantly above the regulatory minimum. The LCR decreased from 311.76% in Q1-2026, reflecting an increase in Net Cash Outflows.

HQLA Variance analysis (Amounts in SAR Millions)

During the period, the groups' HQLA remain highly conservative and primarily sovereign-backed. The group held an average of SAR 203,385 (97.56%) of its High-Quality Liquid Assets (HQLAs) in securities with a 0% risk weight, issued or guaranteed by sovereigns, central groups and supranational entities and cash and reserves. The remaining amounting of SAR 5,086 (2.44%) of HQLAs held a 20% risk weight from securities guaranteed by sovereigns and non-financial corporate bonds rated AA- or better. This composition supports strong liquidity resilience and regulatory compliance.

Cash outflows analysis (Amounts in SAR Millions)

Cash outflows has increased by SR 22,210 driven by both holistic reassessment of data extraction and mapping and time decay of liabilities run-off.

The majority of the group's weighted cash outflows are attributable to non-financial corporates amounting to SAR 52,272 (34.33%) of the total outflows. Whereas retail and small Businesses' deposits held 21.81% amounting to SAR 30,100 outflows compared to SAR 29,618 supported by relatively stable behavioral pattern. Remaining outflows pertain to group placements amounting to SAR 18,732 at 12.57%, while derivatives net positions remain insignificant with 0.17% amounting to SAR 248 of total outflows. The Group's main activities are conducted in SAR USD, and TRY. The peg between SAR and USD currencies enhances the funding ability and provides the flexibility to swap between both currencies.

The group's LCR position comprises of 264% of SAR, 62% of USD and 688% remaining currencies mainly TRY, AED and EUR

Additionally, following the regulatory guidelines, LCR is monitored separately for all significant currencies (above 5% of the group liquidity) to ensure the liquidity ratios are met at all times at group level

Summary for the quarter (Amounts in SAR Millions)

The average Q2-2026 LCR is 243.68% as compared to Q1-2026 LCR is 311.76%, a decrease of 68.08 percentage points. The drop in LCR during Q2-2026 was mainly driven by analysis presented above. In summary, HQLAs increased by 1.54% amounting to SAR 3,164 cash inflows increased by SAR 2,512 and cash outflows increased by SAR 22,210.

This summary movement resulted in total HQLA of SAR 208,471 and Net cashflows of SAR 85,552

compared to previous quarter balances of total HQLA of SAR 205,307 and Net cashflows of SAR 65,854

Overall, the group LCR reflects a strong short-term liquidity position, supported by a sizable HQLA buffer, stable funding sources with no material intra-period liquidity stress observed since the average HQLA for the quarter remained at SAR 208,471.
