23	Liquidity Coverage Ratio (%)		262.58%

The average LCR is calculated by taking a simple average of monthly figures based on daily average balances beginning from Jul 1st, 2025 to Sep 30th, 2025.

During the period, the Bank held an average of 96.85% of its High Quality Liquid Assets (HQLAs) in securities with a 0% risk weight, issued or guaranteed by sovereigns, central banks and supranational entities. The remaining 3.15% of HQLAs held a 20% risk weight from securities guaranteed by sovereigns and non-financial corporate bonds rated AA- or better.

The majority of the bank's weighted cash outflows are attributable to non-financial corporates at 49.72% of outflows. Whereas retail and small Businesses' deposits held 23.96%, and bank placements at 13.54%. SNB's derivatives positions are not significant, as most transactions are conducted on a back-to-back basis with limited open positions being taken. The Group's main activities are conducted in SAR USD, and TRY. The peg between SAR and USD currencies enhances the funding ability and provides the flexibility to interchange between both currencies.

Additionally, following regulatory guidelines, LCR is monitored separately for all significant currencies to ensure the liquidity ratios are met at all times in either currency, SAR, USD and TRY.

The average Q3-2025 LCR is 262.58% as compared to Q2-2025 LCR which was 227.39%, an increase of 35.19%. The increase in the LCR between the two periods is primarily due to increase in HQLA and decrease in net cash outflows.

Basel III Qualitative and Quantitative Pillar 3 Disclosures Policy:

To assure compliance with the requirements of the guidance issued by SAMA dated December 2022, SNB has created Basel III Pillar 3 Disclosures Policy which was approved by the Board. The policy document governs the implementation, process and reporting of Basel III Pillar 3 Disclosures. It describes the scope, guiding principles, required standards and regulations, roles and responsibilities and internal controls for these disclosures.
